Basic function: analogue input 0/4 mA ... 20 mA, 0/1 ... 5 V, 0/2 ... 10 V, 1 and 2 channels.

The isolating repeaters HART Input are used for intrinsically safe operation of 4-wire transmitters or for connection to intrinsically safe voltage sources.

The output signal is a 0/4 ... 20 mA signal.

The versions for 4-wire transmitters transmit a HART communication signal bidirectionally.
